# ABOUT US

BARAK ARMS, officially established in 2004 in Konya, is one of the leading firearms manufacturers in Turkey.

The company has been among the first shotgun manufacturers in Turkey with its experience and knowledge gained in all areas of the arms industry since the 1970s. BARAK ARMS produces weapons that are fully compliant with TSE, ATF, SAAMI and CIP standards. BARAK ARMS produced Turkey's first 12 gauge mag-fed shotgun commonly known as the name BR99 and gained fame in many international markets. Subsequently, it produced 20 caliber and .410 caliber versions of the same model and led the development by making important contributions to the defense and weapons industry in Turkey.

BARAK ARMS, which manufactures at the highest standards and is committed to exceeding expectations in the global market, always acts with the desire to present subjective and innovative firsts to the sector by making continuous and strong investments in R&D activities. BARAK ARMS carries out all production processes such as barrel and receiver, as well as assembly, in its own 2000 square meter factory. BARAK ARMS uses 7075 aluminum for the receiver, lower and upper and 4140 steel for barrel production. BARAK ARMS has a FACILITY SECURITY CLEARANCE CERTIFICATE issued by the Turkish Ministry of Defense.

BARAK ARMS, which has proven its quality by successfully passing various tough tests applied in America, Canada, England and many European countries, exports firearms to many countries of the world today.

\*Cerakote colors available

Front View

Side View

Traumatic shotguns are commonly used in self-defense, police and the military. The barrel of a traumatic shotgun is different from other shotguns. The barrel is specially produced for the use of non-lethal rubber shells only. The receiver of a traumatic shotgun can also be produced for use only for mini shells.
